SmartSelfservice for Orders and Payments Management for Catering, Hospitality, Entertainment

User interface: The Front-end software for the end user

Comfortably seated at the interactive table, the end user selects the type of suggested menu, customizing dishes with ingredients from the Chef, according to their taste or nutritional needs.

Payment Method for the end user

1. ORDER FROM INTERACTIVE TABLE WITH PRE-ORDER RECEIPT:

The customer enters the order and has a pre-order receipt issued with the option to pay later at the manual cashier or at the table.

2. ORDER FROM INTERACTIVE TABLE TRANSFERRED TO SMARTPHONE:

payment through online systems preconfigured and activated by the store (Paypal, Google Pay, etc.) or cash payment at the traditional cashier showing the ID of the order from your smartphone. After scanning the QR Code with the smartphone, proposed by the interactive table, the order is transferred to your device to continue and complete the payment.

Interactive table and entertainment

The interactive table interface proposes pre-installed multi-player games. Ability to use Social App, browse online on YouTube or entertainment websites and chat with other tables.
