WI-FI PAD SMARTMEDIA

The wi-fi pad SmartMedia allows users to leave their desk and illustrate topics, highlight and annotate anything on the active surface, increasing the attention of the participants by making them more involved.

The “multi-user” interface allows the simultaneous use of several pads. Ideal for meetings, demonstrations and everything that requires the active participation of multiple users from the comfort of their desks.

The “print-to-match” feature, which allows users to make annotations, through the active writing of several documents. Just do a page printing, position it on the pad and it is like having the PC screen on your hand

What we write on the sheet, are faithfully reproduced on the PC screen or, if associated with a video projector, on the projection surface (eg cloth, projector, etc ...).

TECHNICAL FEATURES
