Multi-purpose professional touch screen display | Digital Signage | Medical and Industrial Applications

CAP Seriea SmartMedia Monitors

Sturdy and attractive touchscreen displays for professional use equipped with Projected Capacitive (PCAP) technology, with reliable, precise, sensitive touch and rapid response, for smooth and reactive operation with ten touch points.

Fully flat screen display and integrated bezel, ideal for industrial use.

Applications

The 4mm thick Water Resistant and anti-reflective glass applied to the frame, allows for a smooth and easy to clean surface, for better hygiene, without the presence of internal corners, where dirt potentially lurks.

IP55 front protection, resistant to fluids and dusts as well as shocks.

Due to their characteristics, **PCAP monitors are often used in the medical health field.** They are used for ultrasound, ECG, dialysis equipment, blood gas analyzers, dental ultrasonic scalars.

Access to the interfaces for connection to other devices is possible through a door with a safety key, located in the lower part of the monitor.

Main Features

- PCAP (Projected Capacitive) technology for a fast, precise and reliable touch
- Sensitive touch for both with fingers and with dedicated pens
- Android 7.1 Multi-language integrated with 1.8ghz quad-core processor, 2GB RAM, 16GB expandable memory.
- Ports present: USB, HDMI, LAN inputs.SB touch outputs, headphones.
- Connectivity: LAN, WiFi, Bluetooth.
- Integrated WiFi antenna.
- Numerous pre-installed apps including browser for internet access, apps for playing multimedia files, store to download additional apps.
- The monitor can be used horizontally or vertically, installed on the included wall bracket or on a trolley, thanks to the standard VESA mounts.
