

Electric trolley for interactive monitors

TR-TTI

Mobile Electric Turning Rolling Lift Stand for touch monitors that allows the transformation of an interactive monitor into a multi-touch table, due to the supplied remote control that manages the rotation mechanism.

Electrically adjustable in height and inclination according to the needs of individual users, as well as disabled people in wheelchairs.

Merge it with any surfaces of any material in combination with an ultra short-throw projector or with **interactive monitors from 42" to 100"**.

Equipped with four self-locking wheels for agile movements from one environment to another and a safety system whose ascent movement stops when it encounters an obstacle.

Maximum weight supported: 150 kg

Minimum VESA: 300 x 200 mm, Maximum VESA: 800 x 600 mm

Optional Side shelf with shockproof edges, for storing notebooks, document cameras, books, or any other material.
