

Wireless presenter system

Presentation and Joint Collaboration

WPS1000

Corporate and Educational Presentations

Innovative wireless presentation system that allows the distribution of audio-video content on one or more computers on any IWB, video projector or monitor and simultaneously on existing mobile devices (up to 64), in order to make the participation more active and the most engaging and effective presentation.

Ability for participants to spread images, Word, Excel, PowerPoint, and PDF files on their iPad, iPhone, Android tablet or smartphone.

At any time of the presentation the presenter can decide which mobile should deliver Web content and can block it to continue the presentation to another participant.

Each participant, with permission, also has the ability to remotely control the presenter's computer in order to actively interact during the presentation.

Access point for sharing Internet.
